User Manual for Ketone Monitoring Device

Introduction:

Welcome to the user manual for our Ketone Monitoring Device. This manual is designed to guide you through the proper usage and maintenance of the device to ensure accurate and safe monitoring of ketone levels in your breath.

Device Description:

Our Ketone Monitoring Device is a portable device designed to measure ketone levels in your breath. It consists of a handheld unit with three indicator lights: green for normal ketone levels, orange for moderate ketone levels, and red for high ketone levels.

Getting Started:

To begin using the device, ensure it is fully charged using the provided charging cable. Once charged, power on the device by pressing the power button.

Operation:

Exhale into the device until instructed to stop.

Wait for the indicator lights to display your ketone level:

Green light indicates normal ketone levels.

Orange light indicates moderate ketone levels.

Red light indicates high ketone levels.

Record the indicated ketone level and take appropriate action based on the results.

Maintenance and Care:

Clean the mouthpiece of the device after each use using a mild detergent and water.

Store the device in a cool, dry place when not in use to prevent damage.

Safety Information:

Only use the device as instructed in this manual.

Keep the device away from moisture and extreme temperatures.

Do not attempt to disassemble or repair the device yourself.

Consultation with a Doctor:

It is important to consult with your healthcare professional before using this device, especially if you have any medical conditions or concerns. This device is intended to supplement, not replace, professional medical advice.

Disclaimer:

The manufacturer is not responsible for any misuse or improper use of the device. Use of the device without consulting a doctor may result in inaccurate readings or other adverse effects.
